

5 Day Workout Routine

Workout Overview

The following 5 day workout routine is based on a 5 day split. Using this routine, you will train one body part per day for duration of 5 days. This routine will allow you to maximize your training while allowing for optimal rest and recovery times.

Warm Up

The warm up prepares your body for increased physical demands and helps to reduce the chance of injury. A typical warm up might include light stretching and/or low intensity cardiovascular exercise. A few minutes on a bike or treadmill is a great place to start! You could also try a 10 to 15 minute brisk walk.

Cool Down

A cool down period is recommended as it will allow the heart rate to return to its resting rate. This is important because it helps to prevent dizziness and fainting. During the cool down, you might perform activities similar to a warm up. The aim is to gradually decrease the intensity of your workout over the course of several minutes.

Training Sequence

Day 1	Day 2	Day 3	Day 4	Day 5	Day 6	Day 7
Legs	Chest & Abs	Back	Shoulder & Abs	Biceps & Triceps	Rest	Rest

Notes

Please make as many copies as you need of the workout charts listed below. It may be a good idea to store the charts in a folder and update as you progress.
